### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicants amend claims by the limitation that Superabsorbent polymer particles consisting essentially of: (a) a cross linked and preneutralized polymeric resin composition in particular form comprising polymerizable unsaturated acid group containing monomers, and (b) a water swellable or water-insoluble aminopolysaccharide polymer particles, wherein the resulting superabsorbent polymer particles have a degree of neutralization of about 20 mole% or more than the preneutralization degree of the polymeric resin (a). Independent claims 12 and 21 claim Superabsorbent polymer particles consisting essentially of: (a) crosslinked polyacrylic acid resin, and (b) of an aminopolysaccharide polymer particles, wherein the resulting superabsorbent polymer has particle size of from 300 microns to about 600 microns and said particles have a gel bed permeability and a liquid capacity specified in the present claims.

Independent claim 30 discloses a process for the continuous production of superabsorbent polymer composition having a particle size of about 300 microns.

The closest reference of record is U.S. Patent 6,844,430 to Pesce et al. While Pesce discloses an aminopolysaccharide and absorbent gelling material, Pesce does not disclose the superabsorbent polymer in particular form, nor the specified characteristic in the present claims. Also, Pesce fails to disclose a process for producing the superabsorbent polymer composition in particular form.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
